

ARGUS SAFETY UPGRADE ACCELERATOR

Argus Safety
Upgrade Accelerator
TECHSOL
Oracle® Specialized

ORACLE
ARGUS

Techsol is an Oracle
Recognized Specialized
Argus Safety Partner

KEY FACTORS FOR SUCCESSFUL TRANSITION FROM R2 TO R3 FORMAT

- Deeper analysis and preparation of additional R3 data elements like amendments, causality, null etc. for a robust ICSR
- Impact assessment of configuration changes that effect reporting destinations
- Establishing trusted partnership with regulatory agencies for a smoother transition
- Overall change management of process, people and technology

As part of the transition and R3 adoption, your Argus Safety application needs to be upgraded to v8.1.1 (R3 supported) version. You may be on a version 6.x or version 7.x and your application may be installed in your own servers or on a provider cloud. Techsol provide an accelerated upgrade approach that enables effective management of change, shorter timelines and superior quality/compliance. Our upgrade accelerator has following phases:

PHASE 1: Gap and impact assessment. Two weeks of expert consulting to review the impact of the R3 transition on your products, data elements, reporting destination configurations etc. An upgrade SOW is delivered describing scope, RACI, timelines and cost.

PHASE 2: Upgrade. Our accelerated upgrade include following standard tracks:

TRACK 1	TRACK 2	TRACK 3	TRACK 4	TRACK 5
Project planning, governance and tracking	Business	Technology	Validation	Training, Go-live, and Hypercare

We also invite you to evaluate R3 ready, fully managed Techsol Argus Cloud. We will absorb the migration effort; we perform all the hand holding activities for a smoother transition on to our cloud.

FEATURES OF E2B (R3) GAP ASSESSMENT PACKAGE

- 2 weeks of on-site engagement
- Argus and R3 techno functional experts execute conference room pilots to assess and identify impact
- SOW for the upgrade
- Provision to waive off gap assessment consulting fee if upgrade is awarded to Techsol

SALIENT FEATURES OF TECHSOL ARGUS CLOUD

- E2B (R3) ready platform
- Above 99.9% availability
- RTO of up to 4 hours and RPO of up to 30 minutes
- 24 x 7 x 365 Service Desk
- All future upgrades included
